

Perfion & Magento Commerce

How to make your out-of-the-box webshop burst with valuable product information

Perfion & Magento Commerce make your out-of-the-box webshop burst with valuable product information

Webshops with good and comprehensive product descriptions convert visitors to buyers much better than shops without.

Using ERP and a Product Information Management (PIM) solution as the foundation for your e-commerce platform ensures high quality content.

"Perfion has become our leading product data management system. Products, brands, quality data, workflows – everything lives in Perfion. In addition, Perfion provides a very good information base for the electronic business."

Markus Allgaier, Board of Finance and Organization, Mack & Schühle AG

How do e-commerce users benefit from the Perfion & Magento Commerce connection

The Perfion PIM solution integrates completely into your ERP. This means that data from the ERP and Perfion can be used in conjunction with Magento Commerce to generate a webshop with content which is updated real-time.

In short:

- ✓ Business master data is managed in your ERP system
- ✓ Perfion adds all other product information
- ✓ Magento Commerce takes care of the online publication and ordering - and sends order data to the ERP

The Perfion-Magento Connector

If you are already using Perfion as your Single Source of Truth for product information for e.g. catalogs, brochures, fact sheets and pricelists, the Perfion-Magento Connector allows you to effortlessly re-use and publish all the product data to the online Magento Commerce storefront.

The connector supports Magento 2, both for on-premise and cloud versions.

Products can easily be published online while being ordered as well. Your transaction based data, such as prices, inventory etc., stay in the ERP, but can also be managed through Perfion.

Perfion, Magento Commerce and your ERP for a perfect webshop experience

Perfion PIM and Magento Commerce – The best of two worlds

Both Magento Commerce and Perfion are completely focused on developing extremely user-friendly “plug & play” standard solutions, ensuring really good value for money.

Perfion is the standard Product Information Management (PIM) solution for companies with a complex product structure or need for multi-channel, multi-language communication. With Perfion you get a single source of truth for product information which gives you control of all product data wherever they are applied.

Magento Commerce is a leading platform for content and commerce. With Magento Commerce, you get the power to create unique and engaging shopping experiences. With the Magento platform, a global ecosystem of implementation partners, and a vast marketplace of extensions, it's time to bring your commerce vision to life.

Fully integrated with the ERP system

Perfion and Magento Commerce can take your ERP business information as the starting point.

Perfion has been designed and developed for seamless and bi-directional integration with ERP systems. This means that data flowing between your ERP, Perfion and Magento Commerce are always in perfect sync.
